

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 4, between lines 1-4 of the specification with the following:

By means of the processor 16 a value is determined and possibly stored in a ~~memory-19~~ memory 5. A computer (not shown) is connected, for example serially connected, to the connection 6. The display means 7 such as a screen can display the values determined by means of the processor 16.

Replace the paragraph on page 4, between lines 30-32 of the specification with the following:

By means of the ~~memory-19~~ memory 5 it is, for example, possible to save the results for a certain period of time. The results can also be written in a computer via connection 6 with which computer the data produced by the device 1 can be processed still further.
